

Assignment 1: General Online Conference Participation

This assignment involves participation in the online [IEEE RFID 2020 conference](#), 28 Sep – 16 Oct 2020. This particular assignment will help the student learn about good conference attendance skills and technical citizenry.

Questions (Attach Responses):

1. Ask at least one technical question at an interactive session. To which presenter did you ask the question? What was the question? What was the presenter's answer?
2. Summarize one of the technical papers you read and its accompanying online presentations that you attended. What was the name of the talk/paper? Who were the authors and where were they from? What was the problem the researchers were solving or the question they were asking? What is the key result from this work?
3. Attend 1 online networking/social event. Which session did you attend? What was the peak attendance?
4. Ask a question of at least one paper using the EDAS online chat feature. What was the paper and question you asked? What was the presenters' response?
5. Arrange an online one-on-one video/phone chat with another conference attendee who is NOT from your home institution. What interesting thing(s) did you learn from this discussion?
6. Write a nice thank-you email to either an organizing committee member, a presenter, or attendee of your choosing for something that they did well. Attach the correspondence.
7. What was the most interesting thing that you learned during the online IEEE RFID 2020 conference?
